Test	Estimate	95% wild CI	p (two-sided)	Status
Placebo: demand hard to predict (ME6) × laggard → quit	+0.0023	[-0.0077, +0.0113]	0.645	pre-registered placebo
Placebo: demand hard to predict (ME6) × frontier → pre-emption	-0.0149	[-0.0303, +0.0006]	0.064	pre-registered placebo
Placebo: price rises lose customers (ME8) × laggard → quit	-0.0017	[-0.0123, +0.0079]	0.739	pre-registered placebo
Placebo: price rises lose customers (ME8) × frontier → pre-emption	-0.0052	[-0.0193, +0.0084]	0.453	pre-registered placebo
Threat × middle group → quit	+0.0105	[-0.0025, +0.0215]	0.100	exploratory
Threat × middle group → pre-emption	+0.0101	[-0.0036, +0.0236]	0.157	exploratory
Rival unpredictability (ME5) × laggard → quit	-0.0055	[-0.0185, +0.0073]	0.391	exploratory
Rival unpredictability (ME5) × frontier → quit	-0.0183	[-0.0324, -0.0061]	0.020	exploratory
Rival unpredictability (ME5) × laggard → pre-emption	-0.0058	[-0.0119, -0.0008]	0.043	exploratory
Rival unpredictability (ME5) × frontier → pre-emption	+0.0132	[-0.0012, +0.0261]	0.067	exploratory
Threat × frontier → new-to-market product (manuf., selection-corrected)	+0.0076	[-0.0144, +0.0270]	0.465	exploratory (N = 3,109)
Threat × laggard → new-to-market product (manuf., selection-corrected)	+0.0219	[-0.0241, +0.0661]	0.355	exploratory (N = 3,109)

Same specification as the main models. Placebo items were residualised like the threat item. Exploratory tests were listed in the registration as exploratory and carry no decision. Sources: results/06_kis_main.json (placebo), results/07_kis_exploratory.json.
